Dear Sir Madam

| wish to request doctor discretion on releasing information about my father's health and welfare. My father, Mr Krishnaswamy Venkataramanan of 19 Carston Grove, RG317ZN 01189415032, 07757491353, date of birth 18/01/1934 who is a patient with you.

I spoke to your secretary who said she cannot tell about my father, including whether he is alive or dead. My sister Viju Wortley is named as near of kin. I am KV's older daughter. | am not allowed to contact my sister so the secretary felt she will keep everything secret. She does not understand, just because | am not to contact the sister does not mean. I am not to contact anyone on the planet. Just because Viju is named as near of kin does not mean. I am banned from receiving information of my father's health. It is doctor discretion. Doctors will never release medical information to unknown parties.

I have made an effort to identify myself. Now | know that doctors and lawyers do not open attachments so attached them as inline photos. You won't need to download anything to view them. There is a recent bank statement and an older one showing my current address as well as previous UK address. Two forms of identification, two photos of dad and I of myself.

I don't know if this is sufficient to identify myself. If so, there is doctor discretion. Doctors can do what they want w.r.t sharing confidential information or withholding it. Today, 26<sup>th</sup> March 2024 | do not even know if Daddy is alive or dead.

He is not answering his phone. He said 2 days ago he has become seriously ill, and is staying with Viju as he can't take care of himself. His voice sounds like wind through a hollow pipe hardly audible. My sister won't allow me to enter the UK and she won't inform me if our Daddy dies.

Whatever their decision, I would like Drs Mr and Mrs Rock to assist me
