Dear Madam

My name is Mohini Hersom. I am attaching a bank statement and two pieces of identification 2 explain who I am.

My father are normally lives alone in the UK. Since my mother died in February 2022. I was not allowed to attend her funeral due to immigration barriers.

In late 2022 and 2023 I was refused a visitor researcher to the United Kingdom.

I don't want to make an unnecessary application with no new information. When I make an application I want to include new information which will have the approval of a solicitor that things have improved in terms of my prospects of being given a visa

My father has completed 90 years of age in January 2024 and since then he has been deteriorating. He is very dear and he is a very intelligent 90 year old. But with breeding difficulties and hardly able to speak he can't do very much

He is reciting in the home of my sister of and on when he is not well enough to take care of himself

My sister has a trump-club criminal convention against me which she got in 2013. The name of this convection is harassment without violence. Trump that convictions are very rare and the courts are normally just and want to seek the truth. Also some guilty people lie that they are innocent. Naturally people might not believe me and that is not the focus of this matter. Unless a conviction like that is overturned by the courts there is nothing to do about it.

Welcome video wordly has a injunction against me from 2013. Recently it would be up to her discretion to withdraw the injunction but when my father was stronger she told him he would never withdrawite in our whole life. According to my father we choose husband Stephen wartley was suspended temporarily from the atomic weapons establishment where he is a senior scientist in 2012

According to my father who I don't believe would like Stephen wartley told him that the atomic weapons establishment would not tell him why he was suspended. He was then allegedly reinstated and the atomic weapons establishment gave him the first name and last name of my boyfriend in London Who allegedly is behind the emails received by the atomic weapons establishment. Emails were sent to Steve apparently which you are intercepted by the establishment and they found them to be coming from a racist organization

Naturally we don't know which bits of the story are true but I can tell you my boyfriend didn't do it and my father told me you decided to trump up a case against me rather than have any further trouble at the atomic weapons establishment

Lawyers had told me at the time that the conviction was Petty in nature and did not warrant deep audition especially as a prison sentence was not given.v I feel that there is still evidence that there realized made up and it would be nice if some a lawyer could phone atomic weapons establishment and ask them if they have anything against my boyfriend or me on the records mm if they don't Steve was making it up

That is a legal matter but on this date 26 March 2024 I do not know if my father is alive or not. When he deteriorates he goes and lives with video rather than alone in his five bedroom house.

His wife is almost in Audible and sounds like wind moving through a pipe. He has stopped answering the phone. One possibility is that he has declined considerably the other that he is intimidating and brainwashed by which you not to answer the phone.

If my father dies won't be kind enough to let me know and she says that nobody should contact her to get the message. She will prosecute me if I asked through a friend about Father's welfare. Now I don't think that's possible but the Threat is certainly there and maybe I need a lawyer but the police said that unless I state that my father safety is at risk in my sister's house they want to do a live and well check

I am sure he is morally and physically intimidated to be aloof to me and it may be in his best interest not to answer the phone when I call for his own personal safety

I want to ask the doctor if they can release information to me if I prove that I Am His Daughter

Getting a lawyer for love or money is not a straightforward matter. They want thousands of pounds to start a conversation and it's not possible to establish which area of law is belongs to you

I've also tried the mayor of Tadley and Tadley church. I've not able to get a lawyer. They counselor at my father's borrow was more helpful and he said ask this it doesn't Advice Bureau what to do under the circumstances

My father is registered at heel Medical Practice. And the Secretary says she can't tell me if he's alive or dead because I'm not allowed to contact my sister

A secretary is don't know that much and I am only not allowed to contact my sister there is no restriction on contacting anybody else. b so my father has not given authority nor has he said it must be kept private from me so I'm going to apply as I feel he's not in a position to give authority. He's physically and mentally under the control of the manipulative lady and the two of them according to be don't have any limit to what all lies they can tell. Anyway if I prove that I'm his daughter I should have a right to know what's going on with him

I found a very close family friend living next to my parents and she is not picking up the phone

My father said on 14 that he was in a taxi going to his GT

He didn't answer for three consecutive days which was 18 19 20 at the March and I discovered this lady friend of my mother but she's not picking up her landline phone

My father's voice is very hollow since it be a state my sister again recently and I think he's not able to speak. He answered yes to whether he seriously ill and he staying with video because he is not well enough to pick up the phone. Yesterday there was no answer and today it's coming out on available

It's not fair that I can't see him and I also can't know about his condition I don't know what to do why am I supposed to live with this
